Winkerk Online Database
Advantage's for ministers and church admin personnel

Personnel can access Winkerk Online with:

- PC's, Macs, Tablets or Mobile Phones.
- Personnel don't need any paper copies of information.
- Because ministers can update information online while visiting members, it saves a lot of time for church personnel to also update the information.
- Church personnel must authorize the changes in the local Winkerk 7 program.
- The next time that Backup Buddy upload a backup, the changes that were authorized by the admin personnel, will then be merged into the Winkerk Online database.
